## Dear Zenefits Team members:

I am a 2nd year master student studying Computer Science at Carnegie Mellon University, graduating May, 2016. I am currently looking for a full-time UI engineer position at Zenefits upon graduation. I am very impressed by the online HR platform offered by Zenefits and I have heard many reputations about how great the working environment is at Zenefits. Besides, I have strong location preference for San Francisco. Therefore, I REALLY REALLY HOPE to be part of the team. As a candidate with strong academic background, I am confident that I could make positive and productive contribution to Zenefits.

My attached resume has indicated my strong technical skills. Being a well-trained programmer at CMU, I have good understanding of Object Oriented Programming, data structure and algorithm. I have a lot of software development experiences in Java and Python. I can write well-structured code in various various scripting/programming languages and have expert knowledge in protocols such as TCP/IP, HTTP. Besides, I have taken many courses related in web development at CMU and have expertise in many client-side technologies. I am talented in designing neat layout with good sense of artistic inspiration and developing high-fidelity UI components which are flexible, maintainable, reusable and professional for the responsive webpage with consistency across all platforms. I am also a good team player with great communication skills, who is always willing to exchange ideas with other people.

I am a curious person who has wide interests and learn quickly. Besides my technical expertise, I have real passion for art and graphic design. I have been learning drawing at a very young age and I have more than 10 years' experience in using Photoshop. I have a lot of design experience in designing advertisement and poster for companies. I am so fortunate to find out my true pleasure, that is, to write front-end code to visualize my design idea in my brain. The most interesting thing for me is to combine art and technology to create fun and cool stuff.

My previous experiences enable me to step into UI engineer role with well preparations. Please consider the possibility of offer me a full time position at Zenefits. I may be contacted at the phone number (412)932-6740 and e-mail at [xinranli@cmu.edu](mailto:xinranli@cmu.edu). Please also feel free to check more information about me on my personal website: [xinranli.github.io](http://xinranli.github.io)

Thank you for your time and interest. I look forward to hearing back from Zenefits.

Sincerely,

Holly Li
